

High-Tech Design for media technology

Great Sound
Easiest Handling
Mobility

Divisibility

Perfect for Architects and Planners

Commwall turns meeting rooms, huddle spaces, lounges, discussion corners, communication areas, information points, exhibition booths etc. into complete media technology communication areas without any structural changes, drilling, hammering or sawing...

Commwall facilitates and simplifies planning and implementation of complex projects. Thanks to the possible plug-and-play solution there is no need to include different trades.

Commwall is ...

- **Integral unit** for conference, meeting, collaboration, presentation etc.
- **Completely mobile**
- **Dynamic, space-filling sound** and best speech intelligibility for any audio content
- **Individually configurable** manufacturer-independent media technology
- **Modularly** upgradable
- **Interactive** touch option, upgradeable also later on site
- Non-blinding **illumination** with LED elements
- **High-quality timeless design**, can be adapted individually to the customer's needs and other furniture
- **Easiest handling** incl. transport and installation by a **single person**
- Individual **display dimensions from 46" to 85"**
- **No need to coordinate with other trades** (dry construction, interior works, electrics, furniture etc.)

Perfect platform for system integration

Turn Commwall into your individual communication unit.

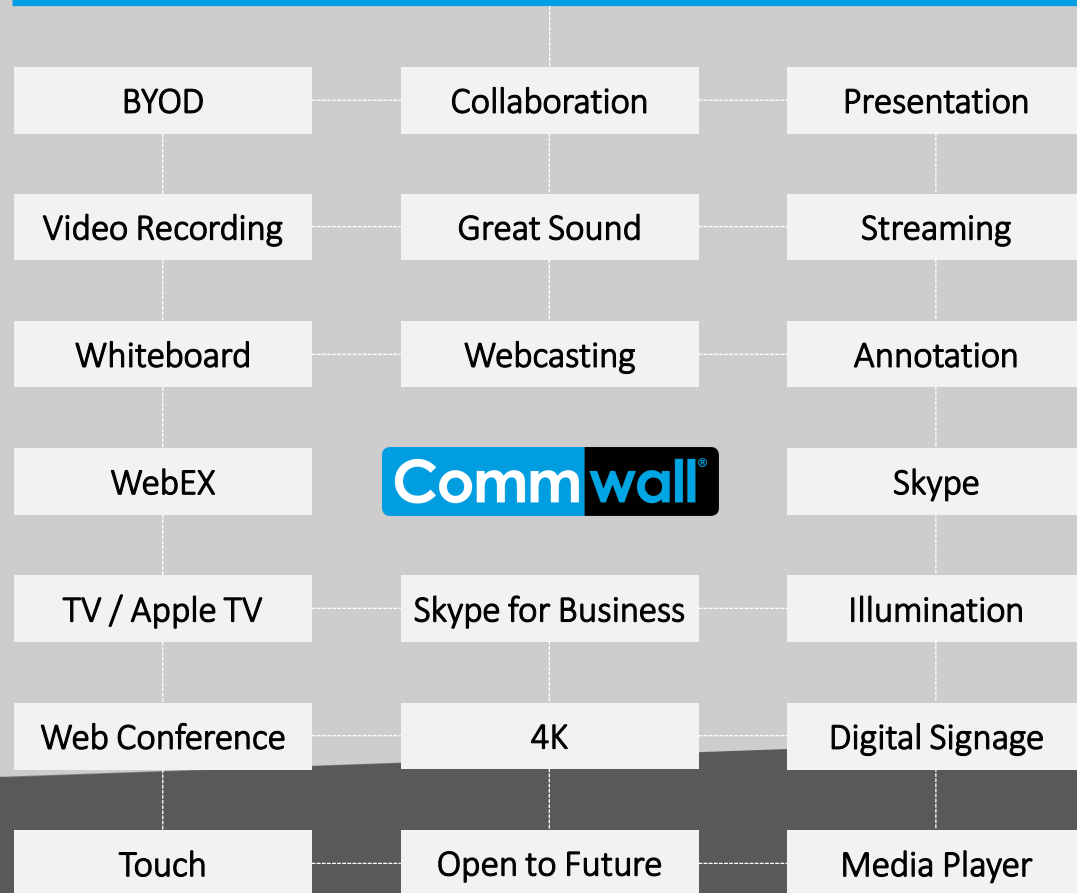

Great Sound as a standard!

Holistic, individual, mobile, well thought-out!

Commwall® - Individually standardizable

Individually configurable / Manufacturer-independent

Media technology individually configurable

All **media technology components** can be installed in the Commwall virtually as in a framework.

Revision and enhancement by new modules are possible at any time.

Display integration

Commwall integrates nearly **all types of displays** **from 46" to 85"** behind glass (touch sensitive glass surface optional) or in a front-cutout.

Display integration

Touch-capable displays

When touch-capable displays are used there is always an **individual cutout** provided in the front.

Retractable Cam / Mic option

Automatic retraction mechanism

For camera and microphone when not in use.

Mechanical Cam/Mic circuit breaker

Option to cut off the power of USB-cameras and microphones.

It will cut off the power automatically when the camera/mic is retracted. It is an un-hackable solution to **prevent unwanted listening in or observing** of your conference room.

sAVdm (Safety AV disconnect mechanism)

Invisible Sound System

Great sound as a standard

LoftSonic® - invisibly integrated

**Perfect sound for any
multi-media content.**

Invisible Sound System

The LoftSonic® loudspeakers equals the way acoustical musical instruments radiate their soundwaves.

The **soundbody** of such musical instruments **vibrate** and thus emits sound-waves.

LoftSonic® mid-high loudspeaker

Sandwich membrane
behind the front

High-performance
Exciter

Exciters causes the front of the Commwall to **vibrate**, thus transforming it into a vibrating **soundbody**.

Commwall®

Subwoofer with depth

For a **maximum bass performance** the LoftSonic® sound system is fitted with a **powerful bass-reflex subwoofer**.

**Integrated DSP
high-performance amplifier**

The LoftSonic® power station

The **DSP-amplifier with power** provides the outstanding **dynamics** of the LoftSonic® sound system.

DSP audio-
system amplifier

Invisible Sound System

LoftSonic® brings emotions to life

- **Dynamic sound**
- **Room-filling acoustic**
- **Best speech intelligibility**

Various audio-presets ex works, optimized for speech, film, music etc.

RAL Coating behind glass

Wood veneers / reproductions

Creative decors / Plain colours

Hundreds of different material and design options

Perfect surface design adaptation to the other furniture (desks, chairs, cabinets etc.) by using the same materials when cooperating with the particular furniture manufacturers

Digital prints
behind Glas, e.g. logos

Glass front white or black as standard

Adapts to the interiors

Exchangeable front panels and side panels make sure that the design can be fitted to the **interior** and the **Corporate Identity**.

Exchangeable
side panels

Exchangeable
front panels

Illumination with LEDs

Side panels with LED elements.

To atmospherically illuminate the
ambience or as lighting scenario.

Lighting scenario
Room occupied

Free choice
of colours

Lighting scenario
Room vacant

The Commwall Family

Commwall and Commwall-Plus with extended camera installation depth up to 205 mm

Product lines

Number of persons

Product line CWI 48 for displays up to 48" (49" on request)

Product line CWI 55 for displays up to 55"

Product line CWI 65 for displays up to 65"

Product line CWI 75 for displays up to 75"

Product line CWI 85 for displays up to 85"

Wall mounting kit

Each **Commwall** can be delivered with a **wall mounting kit** in order to fasten it **directly to the wall** without the base plate.

Self-carrying construction! No special static requirements for the wall (absolutely drywall suitable)

Maintenance

Due to the **self-lifting and carrying construction** the wall-mounted Commwall can be **opened like a door by one person**.

Being then accessible from the back side for maintenance.

Self-lifting and carrying construction on wheels in the center!
No special static requirements for the wall (absolutely drywall suitable)

Mobile between rooms with Commwall-Skate

With the **removable undercarriage** Commwall is mobile and **safely movable by a single person** even in tight spaces and on uneven floors.

Commwall-Skate

Stable unit through
connection rods

Integrated spindle lifting device

Commwall-Lift

The **integrated lifting device** raises Commwall **easily** to the height of the undercarriage.

Easiest handling due to divisibility

Commwall, **divided into handy pieces**, allows trouble-free transportation or movement into other rooms even where the entrance is relatively small (**doors, lifts**).

Side-Skate

With the Commwall-Side-Skate the pieces can be **transported vertically** without problems, e.g. in small lifts.

Side-Skate

Significant **weight reduction** by dismantling the base plate with help of the side-skate.

E.g. for the **transport on stairs**.

One-man-installation / Rental

Safe stowing of Commwall in the flight case system for the road transport.

With the mobile one-man support a **single person** can mount the pieces within a few minutes, e.g. for **installation or when rented out**.

Big-Lift device for paletts etc.

Makes it possible for a **single person** to lift Commwall onto paletts, skateboards, flight cases, etc.

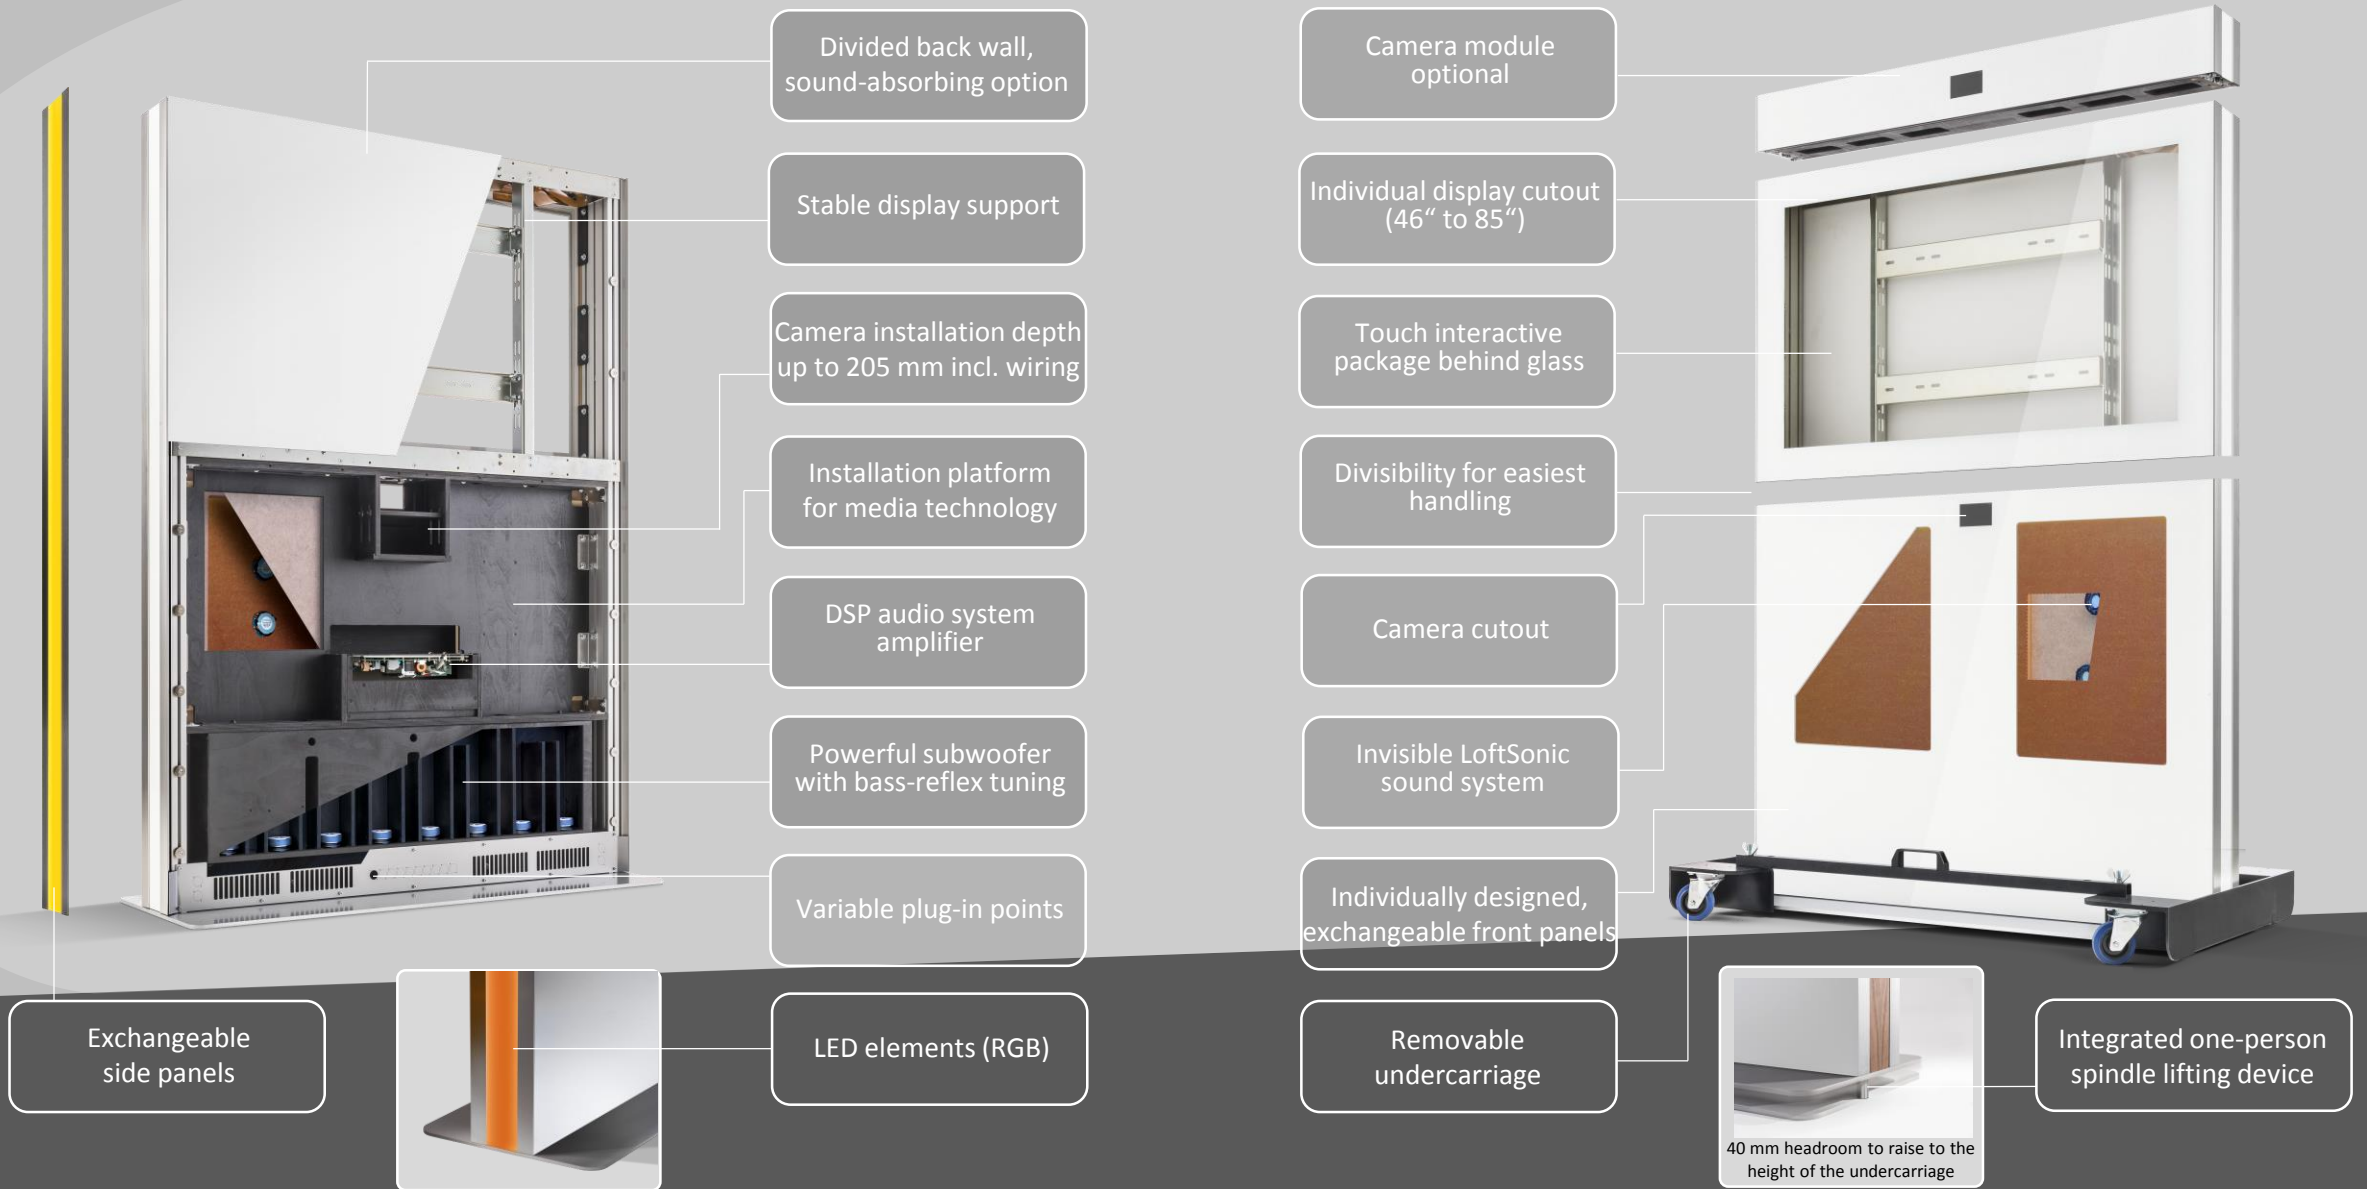

Construction

The unique construction makes Commwall

„UNLIMITED“

and unachievable in its combination of
functionality, handling, and design.

The special features

- Excellent design
- Modularity / mobility
- Great sound
- Camera installation depth up to 205 mm incl. wiring
- On-top camera module
- Sound-absorbing back wall available
- Touch interactive package
- Lifting device Commwall-Lift
- Divisibility for easiest handling
- Direct wall mounting possible
- Exchangeable surface designs
- Exchangeable side panels
- Ambience illumination
- Transportation by a single person
- Nearly unlimited upgrading

Strong arguments

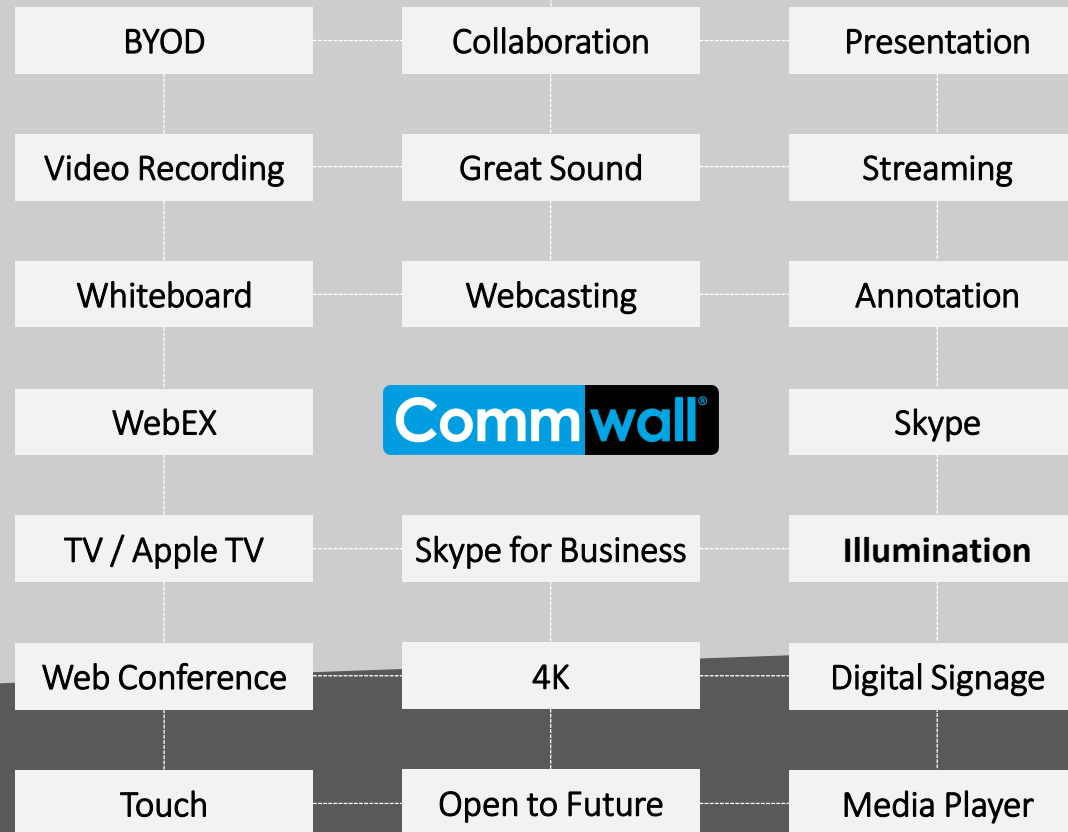

- No need to co-ordinate with other trades
- Integration of manufacturer-independent media technology systems
- Reduced media technology integration process costs
- Reduced costs by virtue of standardized media technology
- Plug-and-Play connectivity possible
- Increased acceptance due to standardized operation at all locations

Thank you very much for your interest

Some facts about ML-Audio und Carbons GmbH

Founded in 1997

Development and production of loudspeaker systems

Specialised since 2000 in developing and manufacturing of Novasonar invisible flatpanel loudspeakers

2016 development of Commwall integrate, High-Tech design for media technology

Commwall

LoftSonic

NOVASONAR

Trademarks

Innovations of ML-Audio:

- Light weight carbon fiber cabinets for PA-Systems
- Boxer technology – Vibration free high-end double 18" PA Subwoofer
- MusicaNova technologie – High-End Long-Throw 3-Wege Koax PA Concert-Sound System
- Novasonar worry-free-concept – Flat panel loudspeakers factory integrated into building materials
- Commwall – High-Tech design for media technology with an invisible high-performance sound system
